COMPANY OVERVIEW

ICT is breaking the rules of traditional transacting. This medium will also determine the success and failure of many currently successful enterprises in times to come, highlighting the influence of technology on competitiveness in the marketplace.

Mackntech Technologies was established in 2013 and officially incorporated in 2015, in order to bridge the gap in the marketplace specializing in the following areas (Data, PBX, VoIP, Internet and Development) Formed by key ICT professionals with 5 years accumulated experience.

At Mackntech Technologies, we believe that excellent service is the key to establishing and maintaining happy and successful relationships between us and our clients.

Our commitment to our clients extends beyond initial development to full support and maintenance on all our projects.

MISSION

- To maintain high levels of competency under good business practice.
- To supply leading products combined with outstanding service and quality.
- To provide high skilled professionals who will meet the clients' needs.
- To meet client needs and strive for high customer service.
